

ASYCUDA was developed by UNCTAD as a means of compiling foreign trade statistics. The software was designed to handle manifests and customs declarations, accounting procedures, transit and suspense procedures. ASYCUDA World is the latest version of the software that has been enhanced by web interface technology to revolutionize Customs, taking trade facilitation in Grenada and the region to another level.

The ASYCUDA Upgrade Project in Grenada is funded through the World Bank, with counterpart funding by the Government of Grenada as part of the GDTAC Project.

“Excellence through Technology”

ASYCUDA improved....

The Grenada Customs Department sets the stage for e-Government in Grenada with the introduction of ASYCUDA World, a dynamic tool, that uses web based technology that will revolutionize the way business is transacted by Customs and traders in Grenada. This new application lends itself to vast improvements in Trade Facilitation and ultimately ease the delays, time consumption and loss of revenue associated with doing business in Grenada.

Benefits

for Government
